## **DETAILED ACTION**

### ***Response to Amendment***

1. This office action is in response to amendment file on 4/29/05.
  - Claims 45-51 have been cancelled.
  - Claims 86-90 are newly added.
  - Claims 1-44, 52-90 are pending.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Art Unit: 2827

2. Claims 16-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Pereira et al. (6,697,276).

Regarding to claims 16-21, Pereira et al. disclose a memory system comprising: a memory array (801) including a plurality of memory cells arranged in segments; and a plurality of tag bit cells (T); wherein the memory cells store content therein as single level or multilevel content; and the memory cell are nonvolatile or volatile; and the tag bits are single level or multilevel. *See. Figs 52-53, 62; Cols. 41-44, 53-54.*

#### ***Allowable Subject Matter***

3. The following is an examiner's statement of reasons for allowance: Claims 1-15, 22-44, 52-90 are allowable over the prior art of record as indicated on the previous office action and on page 18-25 of the remarks/arguments.

#### ***Response to Arguments***

Applicant's arguments with respect to claims 16-21 have been considered but are moot in view of the new ground(s) of rejection.

#### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- Shindo (5,978,246) discloses a content addressable memory device.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
